Mass distribution and elemental analysis of the resultant atmospheric aerosol particles generated in controlled biomass burning processes

N. Ordou, I.E. Agranovski

PII: S0169-8095(17)30786-X
DOI: doi: [10.1016/j.atmosres.2017.08.015](https://doi.org/10.1016/j.atmosres.2017.08.015)
Reference: ATMOS 4042
To appear in: *Atmospheric Research*
Received date: 17 July 2017
Revised date: 14 August 2017
Accepted date: 14 August 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**MASS DISTRIBUTION AND ELEMENTAL ANALYSIS OF THE RESULTANT
ATMOSPHERIC AEROSOL PARTICLES GENERATED IN CONTROLLED
BIOMASS BURNING PROCESSES**

N. Ordou and I.E. Agranovski*
