Aerosol particle DRY DEPOSITION VELOCITY ABOVE natural surfaces: quantification according to the particles diameter

G. Pellerin, D. Maro, P. Damay, E. Gehin, O. Connan, P. Laguionie, D. Hébert, L. Solier, D. Boulaud, E. Lamaud, X. Charrier

PII: S0021-8502(17)30049-6
DOI: <http://dx.doi.org/10.1016/j.jaerosci.2017.09.004>
Reference: AS5179

To appear in: *Journal of Aerosol Science*

Received date: 3 February 2017
Revised date: 4 May 2017
Accepted date: 2 September 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

AEROSOL PARTICLE DRY DEPOSITION VELOCITY ABOVE NATURAL SURFACES: QUANTIFICATION ACCORDING TO THE PARTICLES DIAMETER
