Title: Partial degradation of levofloxacin for biodegradability improvement by electro-Fenton process using an activated carbon fiber felt cathode

Author: Yuexiang Gong Jiuyi Li Yanyu Zhang Meng Zhang
Xiujun Tian Aimin Wang

PII: S0304-3894(15)30190-4
DOI: <http://dx.doi.org/doi:10.1016/j.jhazmat.2015.10.064>
Reference: HAZMAT 17209

To appear in: *Journal of Hazardous Materials*

Received date: 27-8-2015
Revised date: 24-10-2015
Accepted date: 27-10-2015

Please cite this article as: Yuexiang Gong, Jiuyi Li, Yanyu Zhang, Meng Zhang, Xiujun Tian, Aimin Wang, Partial degradation of levofloxacin for biodegradability improvement by electro-Fenton process using an activated carbon fiber felt cathode, *Journal of Hazardous Materials* <http://dx.doi.org/10.1016/j.jhazmat.2015.10.064>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Partial degradation of levofloxacin for biodegradability improvement by
electro-Fenton process using an activated carbon fiber felt cathode**
