

## Accepted Manuscript

Modeling 400–500-kyr Pleistocene carbon isotope cyclicity through variations in the dissolved organic carbon pool

Wentao Ma, Pinxian Wang, Jun Tian

PII: S0921-8181(16)30234-X  
DOI: doi: [10.1016/j.gloplacha.2017.04.001](https://doi.org/10.1016/j.gloplacha.2017.04.001)  
Reference: GLOBAL 2575  
To appear in: *Global and Planetary Change*  
Received date: 20 June 2016  
Revised date: 24 March 2017  
Accepted date: 1 April 2017

Please cite this article as: Wentao Ma, Pinxian Wang, Jun Tian , Modeling 400–500-kyr Pleistocene carbon isotope cyclicity through variations in the dissolved organic carbon pool. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Modeling 400–500-kyr Pleistocene carbon isotope cyclicity through variations in the dissolved organic carbon pool
