Diversity and temporal shifts of the bacterial community associated with a toxic cyanobacterial bloom: An interplay between microcystin producers and degraders

María Ángeles Lezcano, David Velázquez, Antonio Quesada, Rehab El-Shehawy

PII: S0043-1354(17)30687-5

DOI: [10.1016/j.watres.2017.08.025](https://doi.org/10.1016/j.watres.2017.08.025)

Reference: WR 13148

To appear in: *Water Research*

Received Date: 7 April 2017

Revised Date: 5 August 2017

Accepted Date: 10 August 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

# Cyanobacterial bloom

## Associated bacterial community

### Microcystins

### INTERPLAY

## Toxic cyanobacteria
