Chitosan as coagulant on cyanobacteria in lake restoration management may cause rapid cell lysis

Maíra Mucci, Natalia Pessoa Noyma, Leonardo de Magalhães, Marcela Miranda, Frank van Oosterhout, Iamê Alves Guedes, Vera L.M. Huszar, Marcelo Manzi Marinho, Miquel Lürling

PII: S0043-1354(17)30283-X

DOI: [10.1016/j.watres.2017.04.020](https://doi.org/10.1016/j.watres.2017.04.020)

Reference: WR 12817

To appear in: *Water Research*

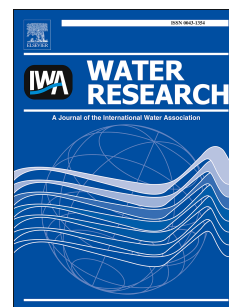

Received Date: 29 December 2016

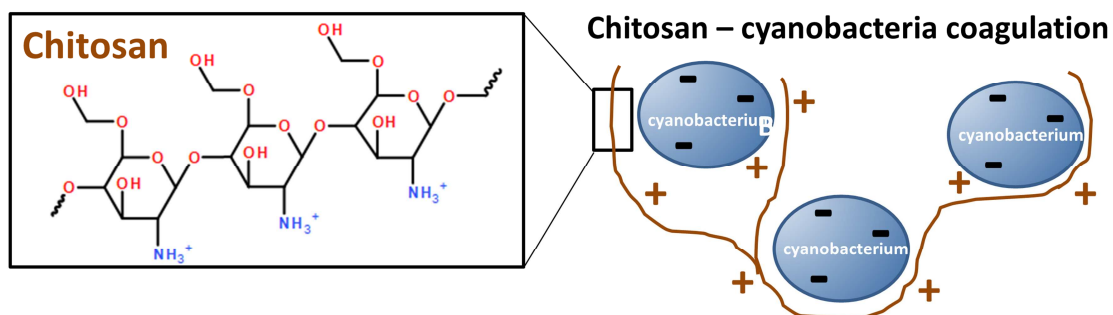

Revised Date: 7 April 2017

Accepted Date: 8 April 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

### Chitosan caused strain dependent membrane damage and cell lysis in cyanobacteria
