Weak magnetic field: A powerful strategy to enhance partial nitrification

Zhibin Wang, Xiaolin Liu, Shou-Qing Ni, Jian Zhang, Xu Zhang, Hafiz Adeel Ahmad, Baoyu Gao

PII: S0043-1354(17)30326-3

DOI: [10.1016/j.watres.2017.04.058](https://doi.org/10.1016/j.watres.2017.04.058)

Reference: WR 12857

To appear in: *Water Research*

Received Date: 21 November 2016

Revised Date: 24 March 2017

Accepted Date: 18 April 2017

Please cite this article as: Wang, Z., Liu, X., Ni, S.-Q., Zhang, J., Zhang, X., Ahmad, H.A., Gao, B., Weak magnetic field: A powerful strategy to enhance partial nitrification, *Water Research* (2017), doi: 10.1016/j.watres.2017.04.058.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

The existence of 5 mT magnetic field increased the activity of AOB while could not change the final state of PN process.
