This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- There is frequent confusion about the terms autocatalytic reaction, autocatalytic cycle, and autocatalytic set.
- We explain and discuss the similarities and differences between these three systems in detail in an effort to avoid further confusion.
- We then discuss the relevance of these systems for origin of life scenarios, emphasizing the possible role of autocatalytic sets.
