Accepted Manuscript

Mathematical Modeling for Meshwork Formation of Endothelial Cells in Fibrin Gels

Daiki Sasaki, Hitomi Nakajima, Yoshimi Yamaguchi, Ryuji Yokokawa, Shin-Ichiro Ei, Takashi Miura

PII: S0022-5193(17)30283-7
DOI: 10.1016/j.jtbi.2017.06.012
Reference: YJTBI 9108

To appear in: *Journal of Theoretical Biology*

Received date: 14 January 2017
Revised date: 20 May 2017
Accepted date: 10 June 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- Authors found new mechanism for pattern formation of endothelial cells.
- Mathematical model reproduced cell protrusion dynamics and network formation.
- Random searching by cells was sufficient to generate the observed meshwork structure.
