

## Accepted Manuscript

An engineering thermodynamic approach to select the electromagnetic wave effective on cell growth

Umberto Lucia , Giulia Grisolia , Antonio Ponzetto ,  
Francesca Silvagno

PII: S0022-5193(17)30307-7  
DOI: [10.1016/j.jtbi.2017.06.029](https://doi.org/10.1016/j.jtbi.2017.06.029)  
Reference: YJTBI 9125

To appear in: *Journal of Theoretical Biology*

Received date: 13 May 2017  
Revised date: 20 June 2017  
Accepted date: 22 June 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Highlights

- Cancer is a non control growth system
- Cell life is the optimisation between power generation and heat exchange with environment
- A control system of cancer growth is suggested by controlling energy balance
- A new elf interaction is proved to control the energy balance
- Consequently cancer growth is reduced
