

Accepted Manuscript

Synergistic elimination of bacteria by phage and the innate immune system

Chung Yin (Joey) Leung, Joshua S. Weitz

PII: S0022-5193(17)30323-5
DOI: [10.1016/j.jtbi.2017.06.037](https://doi.org/10.1016/j.jtbi.2017.06.037)
Reference: YJTBI 9133

To appear in: *Journal of Theoretical Biology*

Received date: 25 July 2016
Revised date: 1 April 2017
Accepted date: 27 June 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- A mathematical model of phage therapy is proposed.
- The model incorporates immune saturation and immune evasion by bacteria.
- The model reveals a robust synergy between phage and host innate immunity.
- Phage-immune synergy may help cure bacterial infections *in vivo*.
