Mitochondria are not captive bacteria

Ajith Harish , C.G. Kurland

PII: S0022-5193(17)30344-2
DOI: [10.1016/j.jtbi.2017.07.011](https://doi.org/10.1016/j.jtbi.2017.07.011)
Reference: YJTBI 9146

To appear in: *Journal of Theoretical Biology*

Received date: 1 April 2017
Revised date: 10 July 2017
Accepted date: 14 July 2017

Please cite this article as: Ajith Harish , C.G. Kurland , Mitochondria are not captive bacteria, *Journal of Theoretical Biology* (2017), doi: [10.1016/j.jtbi.2017.07.011](https://doi.org/10.1016/j.jtbi.2017.07.011)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights:

- Bayesian & Sankoff Parsimony algorithms reconstruct a rooted tree of mitochondria
- The mitochondrial tree is rooted in the Universal Common Ancestor of the ToL
- Descent of mitochondria is autogenic and not endosymbiotic
