This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- An adaptive dynamics framework to study human menopause is proposed.
- Female reproductive strategies alter the social environment.
- The conditions favoring the maintenance of menopause are not equivalent to the conditions favoring its emergence.
