Title: ECO-GENOTOXICITY OF SIX ANTICANCER DRUGS USING COMET ASSAY IN DAPHNIDS

Author: Alfredo Parrella Margherita Lavorgna Emma Criscuolo Chiara Russo Marina Isidori

PII: S0304-3894(15)00014-X
DOI: <http://dx.doi.org/doi:10.1016/j.jhazmat.2015.01.012>
Reference: HAZMAT 16513

To appear in: *Journal of Hazardous Materials*

Received date: 6-8-2014
Revised date: 16-12-2014
Accepted date: 3-1-2015

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ECO-GENOTOXICITY OF SIX ANTICANCER DRUGS USING COMET ASSAY IN
DAPHNIDS

Alfredo Parrella, Margherita Lavorgna, Emma Criscuolo, Chiara Russo, Marina Isidori*

Dipartimento di Scienze e Tecnologie Ambientali, Biologiche e Farmaceutiche, Seconda Università
di Napoli, Via Vivaldi 43, I-81100 Caserta, Italy

Highlights

- Eco-genotoxicity of six anticancer drugs was evaluated.
- *In vivo* Comet assay was performed on cells from whole crustaceans.
- Comet assay was the most sensitive genotoxicity test.
- *C. dubiaw* was used for the first time in the Comet assay.
