Title: Effect of Molecular Structure of Aniline-formaldehyde Copolymers on Corrosion Inhibition of Mild Steel in Hydrochloric Acid Solution

Author: Yan Zhang Mengyan Nie Xiutong Wang Yukun Zhu Fuhua Shi Jianqiang Yu Baorong Hou

PII: S0304-3894(15)00125-9
DOI: <http://dx.doi.org/doi:10.1016/j.jhazmat.2015.02.036>
Reference: HAZMAT 16608

To appear in: *Journal of Hazardous Materials*

Received date: 2-11-2014
Revised date: 27-1-2015
Accepted date: 13-2-2015

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Effect of Molecular Structure of Aniline-formaldehyde Copolymers on Corrosion Inhibition of Mild Steel in Hydrochloric Acid Solution
