Monitoring the staling of wheat bread using 2D MIR-NIR correlation spectroscopy

Tine Ringsted, Heinz Wilhelm Siesler, Søren Balling Engelsen

PII: S0733-5210(16)30381-2

DOI: [10.1016/j.jcs.2017.03.006](https://doi.org/10.1016/j.jcs.2017.03.006)

Reference: YJCRS 2306

To appear in: *Journal of Cereal Science*

Received Date: 25 October 2016

Revised Date: 15 February 2017

Accepted Date: 12 March 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Monitoring the staling of wheat bread using 2D MIR-NIR correlation spectroscopy.
