

## Accepted Manuscript

Flow Dynamics in Vadose Zones with and without Vegetation in an Arid Region

Wenke Wang , Zaiyong Zhang , Tian-chyi Jim Yeh , Gang Qiao ,  
Wenmin Wang , Lei Duan , Shao-Yang Huang , Jet-Chau Wen

PII: S0309-1708(17)30243-9  
DOI: [10.1016/j.advwatres.2017.03.011](https://doi.org/10.1016/j.advwatres.2017.03.011)  
Reference: ADWR 2801

To appear in: *Advances in Water Resources*

Received date: 30 May 2016  
Revised date: 9 February 2017  
Accepted date: 12 March 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- Vegetation impacts on the flow dynamics 3 m deep in the vadose zone.
- Pressure head profiles in the vadose zone reflect heterogeneity distribution in the vadose zone.
- The atmospheric, water table boundary conditions and root systems of plants control the dynamics.
