This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- A surrogate model based iterative ensemble smoother is proposed.
- The PCE surrogate and the interpolation surrogate are adopted for illustration.
- Both single-phase flow and multi-phase flow cases are discussed.
- Comparison with the traditional iterative ensemble smoother is provided.
