This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- We developed new recursive formulation of mean field and local bias estimator
- The estimators incorporate conditional bias penalty in their formulations
- We performed assessments of newly developed schemes in two regions
- Results indicate that incorporating conditional bias does lead to small improvements
