Root channels to indicate the increase in soil matrix water infiltration capacity of arid reclaimed mine soils

Gao-Lin Wu, Yu Liu, Zheng Yang, Zeng Cui, Lei Deng, Xiao-Feng Chang, Zhi-Hua Shi

PII: S0022-1694(16)30844-7

DOI: <http://dx.doi.org/10.1016/j.jhydrol.2016.12.047>

Reference: HYDROL 21726

To appear in: *Journal of Hydrology*

Received Date: 3 November 2016

Revised Date: 12 December 2016

Accepted Date: 23 December 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Root channels to indicate the increase in soil matrix water infiltration capacity of arid reclaimed mine soils
