Continuous Rainfall Generation for a Warmer Climate using Observed Temperature Sensitivities

Conrad Wasko, Ashish Sharma

PII: S0022-1694(16)30791-0

DOI: <http://dx.doi.org/10.1016/j.jhydrol.2016.12.002>

Reference: HYDROL 21681

To appear in: *Journal of Hydrology*

Received Date: 22 March 2016

Revised Date: 14 October 2016

Accepted Date: 2 December 2016

Please cite this article as: Wasko, C., Sharma, A., Continuous Rainfall Generation for a Warmer Climate using Observed Temperature Sensitivities, *Journal of Hydrology* (2016), doi: <http://dx.doi.org/10.1016/j.jhydrol.2016.12.002>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Continuous Rainfall Generation for a Warmer Climate using Observed Temperature Sensitivities

Conrad Wasko¹, Ashish Sharma^{1*}

¹*School of Civil and Environmental Engineering, University of New South Wales, Sydney*

Australia

*Corresponding author; Email: a.sharma@unsw.edu.au

Highlights:

- Continuous rainfall is simulated for a warmer climate.
- Historical sensitivities with temperature are used for parameter fitting.
- Projected increases in rainfall extremes are replicated.

Keywords: Stochastic rainfall generation, temperature, climate change, NSRP, extreme rainfall
