This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Hydrologic connectivity and implications for ecosystem processes - Lessons from naked watersheds

Michael N. Gooseff*, Adam Wlostowski, Diane M. McKnight, and Chris Jaros Institute of Arctic and Alpine Research, University of Colorado, Boulder, CO 80309

* Corresponding Author - michael.gooseff@colorado.edu

Submitted to Geomorphology, special issue on the 2016 Binghamton Conference

Keywords: hydrologic connectivity, McMudro Dry Valleys, Antarctica, hyporheic exchange, polar hydrology
