

## Accepted Manuscript

Sedimentologic and paleoclimatic reconstructions of carbonate factory evolution in the Alborz Basin (northern Iran) indicate a global response to Early Carboniferous (Tournaisian) glaciations

Mehrdad Sardar Abadi, Elena I. Kulagina, Dennis F.A.E. Voeten, Frédéric Boulvain, Anne-Christine Da Silva

PII: S0037-0738(16)30292-5  
DOI: doi: [10.1016/j.sedgeo.2016.11.011](https://doi.org/10.1016/j.sedgeo.2016.11.011)  
Reference: SEDGEO 5138

To appear in: *Sedimentary Geology*

Received date: 4 September 2016  
Revised date: 19 November 2016  
Accepted date: 21 November 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Sedimentologic and paleoclimatic reconstructions of carbonate factory evolution in the Alborz Basin (northern Iran) indicate a global response to Early Carboniferous (Tournaisian) glaciations**
