

Accepted Manuscript

Last glacial and Holocene stable isotope record of fossil dripwater from subtropical Brazil based on analysis of fluid inclusions in stalagmites

Christian Millo, Nicolás M. Strikis, Hubert B. Vonhof, Michael Deininger, Francisco W. da Cruz, Xianfeng Wang, Hai Cheng, R. Lawrence Edwards

PII: S0009-2541(17)30469-2
DOI: doi: [10.1016/j.chemgeo.2017.08.018](https://doi.org/10.1016/j.chemgeo.2017.08.018)
Reference: CHEMGE 18446
To appear in: *Chemical Geology*
Received date: 6 February 2017
Revised date: 16 August 2017
Accepted date: 19 August 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
