On the ionic strength and electrical conductivity of crustal brines

Dionysis I. Foustoukos

PII: S0009-2541(16)30575-7
DOI: doi: [10.1016/j.chemgeo.2016.10.040](https://doi.org/10.1016/j.chemgeo.2016.10.040)
Reference: CHEMGE 18136

To appear in: *Chemical Geology*

Received date: 2 August 2016
Revised date: 22 October 2016
Accepted date: 25 October 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

On the Ionic Strength and Electrical Conductivity of Crustal Brines

Dionysis I. Foustoukos

Geophysical Laboratory, Carnegie Institution of Washington, 5251 Broad Branch Rd. NW,

Washington DC 20015

Keywords: supercritical fluids, brines, NaCl-H₂O, ion solvation, ionic strength, electrical conductivity
