This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

On the Solvation Properties of Supercritical Electrolyte Solutions

Dionysis I. Foustoukos

Geophysical Laboratory, Carnegie Institution of Washington, 5251 Broad Branch Rd. NW,

Washington DC 20015

Keywords: aqueous electrolyte solutions, ion solvation, hydrothermal diamond anvil cell, Raman

vibrational spectroscopy

A Children and a second
