Rhenium-osmium isotopes and highly siderophile elements in ultramafic rocks from the Eoarchean Saglek Block, northern Labrador, Canada: implications for Archean mantle evolution

Akira Ishikawa, Katsuhiko Suzuki, Kenneth D. Collerson, Jingao Liu, D. Graham Pearson, Tsuyoshi Komiya

PII: S0016-7037(17)30447-7
DOI: <http://dx.doi.org/10.1016/j.gca.2017.07.023>
Reference: GCA 10385

To appear in: *Geochimica et Cosmochimica Acta*

Received Date: 20 December 2016
Revised Date: 7 July 2017
Accepted Date: 11 July 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Rhenium-osmium isotopes and highly siderophile elements in ultramafic rocks from the Eoarchean Saglek Block, northern Labrador, Canada: implications for Archean mantle evolution

Akira Ishikawa^{1,2*}, Katsuhiko Suzuki², Kenneth D. Collerson³, Jingao Liu^{4,5}, D. Graham Pearson⁴, Tsuyoshi Komiya¹
