Relationships among physical properties as indicators of high temperature deformation or post-shock thermal annealing in ordinary chondrites

Jon M. Friedrich, Alex Ruzicka, Robert J. Macke, James O. Thostenson, Rebecca A. Rudolph, Mark L. Rivers, Denton S. Ebel

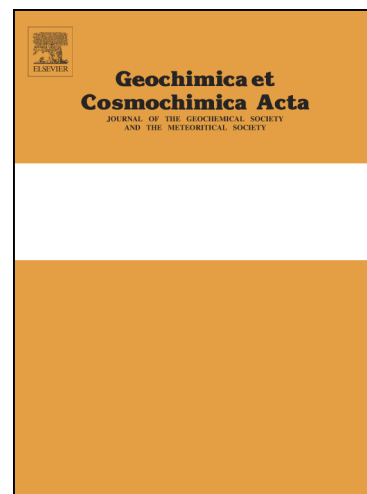

PII: S0016-7037(17)30001-7
DOI: <http://dx.doi.org/10.1016/j.gca.2016.12.039>
Reference: GCA 10091

To appear in: *Geochimica et Cosmochimica Acta*

Received Date: 14 May 2016
Revised Date: 29 December 2016
Accepted Date: 31 December 2016

Please cite this article as: Friedrich, J.M., Ruzicka, A., Macke, R.J., Thostenson, J.O., Rudolph, R.A., Rivers, M.L., Ebel, D.S., Relationships among physical properties as indicators of high temperature deformation or post-shock thermal annealing in ordinary chondrites, *Geochimica et Cosmochimica Acta* (2017), doi: <http://dx.doi.org/10.1016/j.gca.2016.12.039>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
