

## Accepted Manuscript

Origin of reverse compositional and textural zoning in granite plutons by localized thermal overturn of stratified magma chambers

Jakub Trubač, Vojtěch Janoušek, Jiří Žák, Michael Somr, Petr Kabele, Jan Švancara, Axel Gerdes, Eliška Žáčková

PII: S0024-4937(16)30331-0  
DOI: doi: [10.1016/j.lithos.2016.10.002](https://doi.org/10.1016/j.lithos.2016.10.002)  
Reference: LITHOS 4100

To appear in: *LITHOS*

Received date: 14 December 2015  
Revised date: 16 September 2016  
Accepted date: 1 October 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Origin of reverse compositional and textural zoning in granite plutons by localized thermal overturn of stratified magma chambers**
