

## Accepted Manuscript

Facies variations in response to Holocene sea-level and climate change on Bora Bora, French Polynesia: Unravelling the role of synsedimentary siderite in a tropical marine, mixed carbonate-siliciclastic lagoon

Anja Isaack, Eberhard Gischler, J. Harold Hudson, Flavio S. Anselmetti, Stephan Buhre, Gilbert F. Camoin

PII: S0025-3227(16)30251-1

DOI: doi: [10.1016/j.margeo.2017.05.002](https://doi.org/10.1016/j.margeo.2017.05.002)

Reference: MARGO 5618

To appear in: *Marine Geology*

Received date: 13 October 2016

Revised date: 24 April 2017

Accepted date: 3 May 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Facies variations in response to Holocene sea-level and climate change on Bora Bora, French Polynesia: unravelling the role of syndimentary siderite in a tropical marine, mixed carbonate-siliciclastic lagoon**
