Accepted Manuscript

Geochemical and Nd-isotopic compositions of juvenile-type Paleoproterozoic Birimian sedimentary rocks from southeastern West African Craton (Ghana): constraints on provenance and tectonic setting

Daniel Asiedu, Samuel Asong, David Atta-Peters, Patrick Asamoah Sakyi, Ben-Xun Su, Samuel Dampare, Chris Anani

PII: S0301-9268(17)30004-9

DOI: http://dx.doi.org/10.1016/j.precamres.2017.07.035

Reference: PRECAM 4845

To appear in: Precambrian Research

Received Date: 5 January 2017 Revised Date: 29 April 2017 Accepted Date: 22 July 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
