Geochemical characterization and petrogenesis of intermediate to silicic rocks in ophiolites: A global synthesis

Harald Furnes, Yildirim Dilek

PII: S0012-8252(17)30005-3
DOI: doi:[10.1016/j.earscirev.2017.01.001](https://doi.org/10.1016/j.earscirev.2017.01.001)
Reference: EARTH 2367

To appear in: *Earth Science Reviews*

Received date: 5 April 2016
Revised date: 4 January 2017
Accepted date: 5 January 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Geochemical characterization and petrogenesis of intermediate to silicic rocks in ophiolites: A global synthesis
