

Accepted Manuscript

Geochemical and geochronological constraints on distinct Early-Neoproterozoic and Cambrian accretionary events along southern margin of the Baydrag Continent in western Mongolia

David Buriánek, Karel Schulmann, Kristýna Hrdličková, Pavel Hanžl, Vojtěch Janoušek, Axel Gerdes, Ondrej Lexa

PII: S1342-937X(16)30285-4
DOI: doi: [10.1016/j.gr.2016.09.008](https://doi.org/10.1016/j.gr.2016.09.008)
Reference: GR 1682

To appear in: *Gondwana Research*

Received date: 9 March 2016
Revised date: 16 September 2016
Accepted date: 18 September 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Geochemical and geochronological constraints on distinct Early-
Neoproterozoic and Cambrian accretionary events along southern
margin of the Baydrag Continent in western Mongolia
