

Accepted Manuscript

Full paleostress tensor reconstruction using quartz veins of Panasqueira Mine, central Portugal; part I: Paleopressure determination

Luís Jaques, Christophe Pascal

PII: S0191-8141(17)30147-5

DOI: [10.1016/j.jsg.2017.07.006](https://doi.org/10.1016/j.jsg.2017.07.006)

Reference: SG 3502

To appear in: *Journal of Structural Geology*

Received Date: 17 February 2017

Revised Date: 12 July 2017

Accepted Date: 17 July 2017

Please cite this article as: Jaques, Luí., Pascal, C., Full paleostress tensor reconstruction using quartz veins of Panasqueira Mine, central Portugal; part I: Paleopressure determination, *Journal of Structural Geology* (2017), doi: 10.1016/j.jsg.2017.07.006.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Full paleostress tensor reconstruction using quartz
veins of Panasqueira Mine, central Portugal; part I:
paleopressure determination.**
