Imaging a soil fragipan using a high-frequency multi-channel analysis of surface wave method

Zhiqu Lu, Glenn V. Wilson

PII: S0926-9851(17)30508-6
DOI: doi:[10.1016/j.jappgeo.2017.05.011](https://doi.org/10.1016/j.jappgeo.2017.05.011)
Reference: APPGEO 3277

To appear in: *Journal of Applied Geophysics*

Received date: 27 August 2016
Revised date: 22 February 2017
Accepted date: 21 May 2017

Acknowledgements

This work was supported by the U. S. Department of Agriculture under Specific Cooperative Agreement 58-6408-7-234. The authors wish to express their appreciation to Alan Hudspeth, Allen Gregory, and Xiaobin Wu for their outstanding technical support and to the Mississippi Agricultural and Forestry Experiment Station for the use of their facilities in Holly Springs. The first author also would like to thank Julian Ivanov and Jianghai Xia for inspiring discussions and Craig Hickey for providing a modified penetrometer.
