

## Accepted Manuscript

Heat flow evolution of the Earth from paleomantle temperatures: Evidence for increasing heat loss since ~2.5 Ga

Javier Ruiz

PII: S0031-9201(16)30036-X  
DOI: <http://dx.doi.org/10.1016/j.pepi.2017.06.001>  
Reference: PEPI 6047

To appear in: *Physics of the Earth and Planetary Interiors*

Received Date: 29 April 2016  
Revised Date: 2 June 2017  
Accepted Date: 5 June 2017

Please cite this article as: Ruiz, J., Heat flow evolution of the Earth from paleomantle temperatures: Evidence for increasing heat loss since ~2.5 Ga, *Physics of the Earth and Planetary Interiors* (2017), doi: <http://dx.doi.org/10.1016/j.pepi.2017.06.001>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Heat flow evolution of the Earth from paleomantle  
temperatures: Evidence for increasing heat loss since ~2.5 Ga**
