Anthropogenically induced landslides – A challenge for railway infrastructure in mountainous regions

Hans Jörg Laimer

PII: S0013-7952(16)30733-5  
DOI: doi: [10.1016/j.enggeo.2017.03.015](https://doi.org/10.1016/j.enggeo.2017.03.015)  
Reference: ENGEO 4528  
To appear in: *Engineering Geology*  
Received date: 30 November 2016  
Revised date: 13 March 2017  
Accepted date: 22 March 2017

Please cite this article as: Hans Jörg Laimer , Anthropogenically induced landslides – A challenge for railway infrastructure in mountainous regions. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. Enggeo(2017), doi: [10.1016/j.enggeo.2017.03.015](https://doi.org/10.1016/j.enggeo.2017.03.015)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Anthropogenically induced landslides – a challenge for railway infrastructure  
in mountainous regions

Hans Jörg Laimer  
Infrastruktur AG, Austrian Federal Railways  
Weiserstr. 9, 5020 Salzburg, Austria
