16 **ABSTRACT.** The material reported herein comes from the Early Cretaceous Agrio Formation

17 (Neuquén Basin, west-central Argentina). These fishes dwelled in a Pacific Ocean embayment in

18 southwestern Gondwana before the establishment of the Andean Cordillera. The material consists of

19 an incomplete dorsal fin spine of the widespread Hybodontidae clade (from upper Valanginian

20 beds) and a partial tooth of one of the earliest known lamniforms (from upper Hauterivian beds).

21

22 *Keywords:* Chondrichthyes, Agrio Formation, South America, Gondwana.
