Role of Histamine H1-receptor on Behavioral States and Wake Maintenance during Deficiency of a Brain Activating System: a Study using a Knockout Mouse Model

Régis Parmentier, Yan Zhao, Magali Perier, Hideo Akaoka, Minnamaija Lintunen, Yiping Hou, Pertti Panula, Takashi Watanabe, Patricia Franco, Jian-Sheng Lin, MD & PhD

PII: S0028-3908(15)30210-0

DOI: [10.1016/j.neuropharm.2015.12.014](https://doi.org/10.1016/j.neuropharm.2015.12.014)

Reference: NP 6112

To appear in: *Neuropharmacology*

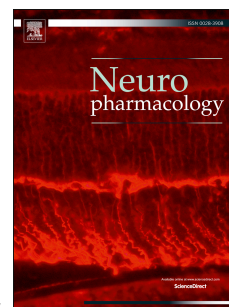

Received Date: 4 September 2015

Revised Date: 10 December 2015

Accepted Date: 14 December 2015

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Role of Histamine H1-receptor on Behavioral States and Wake Maintenance during Deficiency of a Brain Activating System: a Study using a Knockout Mouse Model

Régis Parmentier^{1*§}, Yan Zhao^{1,2*}, Magali Perier¹, Hideo Akaoka¹, Minnamaija Lintunen^{3#}, Yiping Hou⁴, Pertti Panula³, Takashi Watanabe⁵, Patricia Franco¹ and Jian-Sheng Lin¹

Present Institution: University of Turku and Turku University Hospital

Acknowledgments : This work was supported by INSERM U480, U628, U1028-Waking team, Claude Bernard University and by the European Contract No. QLRT-2001-00826 (5th PCRDT). The doctoral fellowship of R. Parmentier was provided by the *Ministère de l'éducation nationale, de la recherche et de la technologie* (France). The fellowship of Y. Zhao was provided by the *Institut Franco-Chinois* (Lyon, France). We thank the late Dr. Jean-Louis Valatx for help at the start of the project and Dr. Luc Gentet for critical reading of the manuscript. Data of this study have been communicated at the Society for Neuroscience 32nd annual meeting (Orlando, USA, 2002) and European Histamine Research Society 35th annual meeting (Delphi, Greece, 2006) and published in abstract form (Lin et al., 2002; Parmentier et al., 2006).

Key words: wakefulness, arousal, sleep-wake cycle, cortical activation, histamine, H1-receptor, knockout mice, EEG, behavior, cholinergic transmission, compensation.
