Acknowledgements:

We would like to thank Frédéric Le Gal, Natali Abeywickrama Samarakoon, Jean-Claude Cortay and Camille Sureau for helpful discussions. Dulce Alfaiate was supported by grants from Fundação Calouste Gulbenkian and Fundação para a Ciência e a Tecnologia. DD and PD were supported by grants from ANRS (French national agency for research on AIDS and viral hepatitis; several grants from CSS4), FINOVI (Foundation for innovation in infectiology; project call n°4), FRM (Foundation for medical research; DEQ20110421327), Hoffmann-La-Roche Ltd (Switzerland division) and by INSERM core grants and interface contract (PD). DD is also supported by the DEVweCAN LABEX (ANR-10-LABX-0061) of the "Université de Lyon", within the program "Investissements d'Avenir" (ANR-11-IDEX-0007) operated by the French National Research Agency (ANR).
