

Author's Accepted Manuscript

The exit strategy: pharmacological modulation of extracellular matrix production and deposition for better aqueous humor drainage

Padmanabhan P. Pattabiraman, Carol B. Toris

PII: S0014-2999(16)30274-6
DOI: <http://dx.doi.org/10.1016/j.ejphar.2016.04.048>
Reference: EJP70616

To appear in: *European Journal of Pharmacology*

Received date: 27 January 2016
Revised date: 20 April 2016
Accepted date: 22 April 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Special Issue “Ocular pharmacology: Cinderella becomes the queen”

The exit strategy: pharmacological modulation of extracellular matrix production and deposition for better aqueous humor drainage.

Authors: Padmanabhan P. Pattabiraman¹, Carol B. Toris^{1*}

Funding: An unrestricted grant from Research to Prevent Blindness

Manuscript includes 1 table.

Outline:

- *Understanding the aqueous humor outflow pathways*
- *Extracellular matrix components in the outflow pathways*
- *Regulators of extracellular matrix in the aqueous humor outflow pathways*
- *Outflow enhancing drugs and their effects on extracellular matrix*
- *Clearing extracellular matrix deposition - An exit strategy*
- *Future directions*
