Systemic metabolic derangement, pulmonary effects, and insulin insufficiency following subchronic ozone exposure in rats

Desinia B. Miller, Samantha J. Snow, Andres Henriquez, Mette C. Schladweiler, Allen D. Ledbetter, Judy E. Richards, Debora L. Andrews, Urmila P. Kodavanti

PII: S0041-008X(16)30169-7
DOI: doi: [10.1016/j.taap.2016.06.027](https://doi.org/10.1016/j.taap.2016.06.027)
Reference: YTAAP 13691

To appear in: *Toxicology and Applied Pharmacology*

Received date: 12 May 2016
Revised date: 23 June 2016
Accepted date: 26 June 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Systemic Metabolic Derangement, Pulmonary Effects, and Insulin Insufficiency Following Subchronic Ozone Exposure in Rats

Disclaimer: The research described in this article has been reviewed by the National Health and Environmental Effects Research Laboratory, U.S. Environmental Protection Agency, and approved for publication. Approval does not signify that the contents necessarily reflect the views and policies of the Agency, nor does the mention of trade names of commercial products constitute endorsement or recommendation for use.

Acknowledgments: We thank Dr. Christopher Gordon and Dr. Colette Miller of the US EPA for their critical review of this manuscript. We also like to thank Ms. Virginia Bass (UNC, Chapel Hill, NC) for her help in the experiment. Mr. Dock Terrell is acknowledged for his help in performing ozone exposures. This research was supported by the US-EPA-University of North Carolina Cooperative Trainee Agreement (#CR-83515201), and UNC-NIEHS Toxicology Training Grant (T32 ES007126). The funders had no role in study design, data collection and analysis, decision to publish, or preparation of the manuscript.
