This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

PCTA and β -HCH in invasive ductal carcinoma patients' blood were higher than control
 β -HCH, PCTA and *pp'*-DDE in adipose tissue beside ductal carcinoma were higher as well
All of them were increasingly higher among three degrees of invasive ductal carcinoma

The organochlorine pesticides residues in the invasive ductal breast cancer patients
