This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Diabetic cataract is induced by oxidative stress and inflammation.
- Thymoquinone has prominent antioxidant and anti-inflammatory effects.
- Thymoquinone ameliorates eye lens changes in diabetic rats.

Ameliorative effects of thymoquinone against eye lens changes in streptozotocin diabetic rats
