Title: Considerations for conducting imaging studies in support of developmental toxicology studies for regulatory submission

Author: Colena Johnson Christopher T. Winkelmann L. David Wise

PII: S0890-6238(14)00082-3
DOI: <http://dx.doi.org/doi:10.1016/j.reprotox.2014.05.006>
Reference: RTX 6961

To appear in: *Reproductive Toxicology*

Received date: 26-3-2014
Revised date: 9-5-2014
Accepted date: 12-5-2014

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- We discuss issues to consider when using imaging data for regulatory submission.
- We describe some of the basic methodology for conducting imaging studies in a regulated environment.
- Validation of imaging systems within the GLP framework allows for the regulatory submission of data which will aid in the de-risking of compounds during the pre-clinical and clinical development phases.
