Article Type: Clinical Research Study

Authorship:

S.K., T.Y., D.D., and T.D. were involved in the conception and design of the study. S.K. and T.Y. were responsible for the data collection. S.K. performed analysis. S.K. wrote the manuscript, D.D., T.D. and T.Y. provided critical review. All authors had access to the data. All authors were involved in drafting the manuscript.

Permissions: Written permission has been obtained from the person listed in the acknowledgements.

Conflicts of interest: None

Funding: None

Keywords: clinical decision support; red blood cell transfusion; overuse; Choosing Wisely; interrupted time series analysis; alert; electronic health record; electronic medical record; anemia; transfusion; quality

Running Head: Clinical decision support to reduce overuse of red blood cell transfusions
