Mechanisms of Exercise-Induced Hypoalgesia

Kelli F. Koltyn, Angelique G. Brellenthin, Dane B. Cook, Nalini Sehgal, Cecilia Hillard

PII: S1526-5900(14)00915-8

DOI: [10.1016/j.jpain.2014.09.006](https://doi.org/10.1016/j.jpain.2014.09.006)

Reference: YJPAI 2986

To appear in: *Journal of Pain*

Received Date: 28 February 2014

Revised Date: 17 July 2014

Accepted Date: 12 September 2014

Please cite this article as: Koltyn KF, Brellenthin AG, Cook DB, Sehgal N, Hillard C, Mechanisms of Exercise-Induced Hypoalgesia, *Journal of Pain* (2014), doi: 10.1016/j.jpain.2014.09.006.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Mechanisms of Exercise-Induced Hypoalgesia

Kelli F. Koltyn¹, Angelique G. Brellenthin,¹ Dane B. Cook,¹ Nalini Sehgal,² and Cecilia Hillard³

Department of Kinesiology¹ and Department of Rehabilitation Medicine²
University of Wisconsin-Madison^{1,2}
Department of Pharmacology and Toxicology³
Medical College of Wisconsin³

Research was conducted at the University of Wisconsin Hospital and Clinics: Clinical Research Unit
