This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Blood Pressure Deviations From Optimal Mean Arterial Pressure During Cardiac Surgery
Measured With A Novel Monitor of Cerebral Blood Flow And Risk For Perioperative Delirium:
A Pilot Study
