This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Title: Accelerometer based devices can be used to monitor sedation/agitation in the intensive care unit

Authors: Rishi Raj MD¹, Kamonpun Ussavarungsi MD², Kenneth Nugent MD³

Institutional Affiliations: Northwestern University Feinberg School of Medicine, Chicago Illinois¹; Mayo Clinic, Jacksonville Florida², Texas Tech University Health Sciences Center, Lubbock Texas³

Institution where work was done: Texas Tech University, Lubbock Texas

Corresponding Author: Rishi Raj, MD
Northwestern University Feinberg School of Medicine

Chicago, IL 60611
Phone: 312-695-1544
Email: rishi.raj@northwestern.edu

Word count: Abstract 177 words, Manuscript 2806 words

Tables: 2

Figures: 3

Running title: Accelerometers for monitoring sedation/agitation

Conflict of interest: Kenneth Nugent, Kamonpun Ussavarungsi and Rishi Raj have no conflict of interest relevant to this study and the manuscript.

Funding/Grant: None

Keywords

Actigraphy, accelerometer, monitoring, sedation, agitation, intensive care unit

Acknowledgements: The authors would like to thank Dr. Richard Wunderink for reviewing the manuscript and suggesting appropriate changes, Tonya Brown BSN CCRN and Benjamin Batson BSN CCRN for observation and data collection for the project, and the Clinical Research Unit at Texas Tech University Health Sciences Center Lubbock for providing material support to make this study possible.
