This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Frequency of Acute Changes Found On Head CTs in Critically Ill Patients: A Retrospective Cohort Study

1. Shaila Khan, MB BS, MPH, General Internal Medicine, Whipps Cross University Hospital, London, UK; shaila311@googlemail.com

2. Carmen Guerra, MPH, Department of Anesthesiology, College of Physicians and Surgeons, Columbia University, New York, NY; cg2397@columbia.edu

3. Alexander Khandji, MD, Department of Radiology, College of Physicians and Surgeons, Columbia University, New York, NY; agk3@columbia.edu

4. Rebecca M. Bauer, MD, MPH, Department of Anesthesiology, University of Wisconsin School of Medicine and Public Health; rbauer2@wisc.edu

5. Jan Claassen, MD, Department of Critical Care Neurology, College of Physicians and Surgeons, Columbia University, New York, NY; jc1439@cumc.columbia.edu

6. Hannah Wunsch, MD, MSc, Departments of Anesthesiology, College of Physicians and Surgeons, Columbia University, New York, NY; Department of Epidemiology, Mailman School of Public Health, Columbia University, New York, NY; hw2125@cumc.columbia.edu

### The work was done at Columbia University

**Research support:** Supported by Award Number K08AG038477 from the National Institute on Aging to Dr. Wunsch and the National Center for Research Resources and the National Center for Advancing Translational Sciences, National Institutes of Health, through Grant Number UL1 RR024156. The funders had no role in the design and conduct of the study; collection, management, analysis, and interpretation of the data; and preparation.
